

Air Powered Rocket Launchers V5.0

Instructables

Work Product

Learn aerodynamics of a rocket, simple trigonometry for height competitions, or more advanced math to calculate the rocket trajectory,

Suggested Learning					
Time	40 : 00	Cost	20.00		
PreRequisites					
Requirements					
			 Printer	 Tools	
Skills		Focus	Level	Standard	Points
 Engineering					209
 Troubleshooting					56
 Mathematics					56
 Critical Thinking					56
 Problem Solving					56
Total Skill Points					433
Knowledge Gain					
Physical mechanical process for building a paper rocket. Use mathematics to understand the flight trajectory.
